

Type 4 Replacement Lens for RM Series Street Lights, 50,000 h LED Lifetime

- Type 4 optical pattern for directional roadway illumination
- Direct replacement lens for compatible RM Series street light fixtures
- Rated for 50,000 -hour LED lifetime
- Backed by a 1 -year warranty
- Constructed to withstand harsh outdoor weather conditions

OVERVIEW

The Type 4 Replacement Lens for the RM Series street lights is a precision optical component designed to deliver concentrated, directional illumination suited for roadways, parking lots, and residential streets. It is intended as a direct replacement lens for compatible RM Series fixtures, maintaining the optical integrity of the original installation.

The lens produces consistent, uniform light distribution characteristic of a Type 4 pattern, directing output toward the roadway while minimizing spill into adjacent areas. It is constructed to withstand harsh weather conditions and integrates into the RM Series fixture without compromising the fixture's profile or performance.

The lens is backed by a 1 -year warranty and is rated for a 50,000 -hour LED lifetime when paired with the RM Series fixture.
