

Bullhorn Adapter for 3-Inch Pole with Dual 2-3/8-Inch Arms, Bronze Finish

OVERVIEW

The 1-ST-Z-P3-BH2-B is a bullhorn-style pole adapter designed to mount on a 3-inch diameter pole and accept two 2-3/8-inch tenon arms. It is intended for commercial and municipal outdoor lighting installations where a single pole must support dual luminaire positions at a fixed lateral offset.

The adapter creates two 2-3/8-inch tenons oriented in a bullhorn configuration, allowing paired fixture mounting on a common pole without additional hardware. The bronze finish provides corrosion resistance suitable for exterior environments. Physical dimensions and weight data are not available in current source documentation.

No certifications are confirmed in the available source data. Warranty terms and compliance documentation should be verified with Poli LED & Signs prior to specification. Contractors and engineers are advised to confirm compatibility with pole base ratings and local installation requirements before ordering.
