

Vertical Tenon Reducer for 4.6" Round Pole to 2-3/8" Tenon, Bronze Finish

- Fits 4.6-inch round pole and reduces to 2-3/8-inch tenon
- Bronze finish provides corrosion resistance
- Secure mounting interface for compatible fixtures and equipment
- Backed by a 1-year warranty
- Compatible with fixtures rated for 50,000-hour LED lifetime

OVERVIEW

The Vertical Tenon Reducer is a pole accessory designed to mount onto a 4.6-inch round pole and reduce the connection point to a 2-3/8-inch tenon. It provides a secure mounting interface for compatible fixtures and equipment, making it suitable for parking lot lighting, streetscape installations, and architectural pole applications.

Constructed with a bronze finish, the reducer offers corrosion resistance along with a clean, professional appearance consistent with commercial and industrial site requirements. It carries a 1-year warranty and is rated for use with fixtures having an LED lifetime of 50,000 hours.
