

- ### Screw Positioning Plate for SLP Light Pole, 1 lb, Bolt-Down Mounting Hardware
- Weighs 1 lb for straightforward handling during installation
 - Strategically placed screw holes guide accurate pole alignment
 - Supports structural integrity of the SLP light pole assembly
 - Low-profile design complements SLP pole aesthetics
 - Backed by a 1-year warranty

OVERVIEW

The Screw Positioning Plate is a dedicated mounting component designed for use with SLP series light poles. It provides a stable, accurately aligned interface between the pole and its mounting surface, simplifying installation and reducing setup time through strategically placed screw holes that guide proper alignment.

Constructed from durable materials, the plate is engineered to support the structural integrity of the light pole assembly and resist external mechanical forces over the long term. Its low-profile design is intended to complement the SLP pole aesthetically without adding unnecessary bulk to the installation.

The plate is backed by a 1-year warranty.
