

LED Wall Washer 24VDC 24W 3200K Warm White IP68 SMD4040

OVERVIEW

The WW2 LED Wall Washer is a linear 24VDC fixture engineered for commercial and architectural wall washing applications. Available in a 1M length with a cross-section of 40x26mm, it delivers uniform grazing illumination across vertical surfaces in both interior and exterior installations.

The fixture operates at 24W using a dual-chip configuration and produces warm white light at 3200K color temperature. The 24VDC input voltage is compatible with standard low-voltage driver infrastructure common in commercial projects. The IP68 rating qualifies the fixture for fully submersible and exposed outdoor environments, including facades, grade-level installations, and wet locations.

This fixture carries a confirmed IP68 ingress protection rating, verifying complete dust exclusion and sustained water immersion resistance. No additional certifications are confirmed in available source documentation. Contractors should verify compliance requirements for their jurisdiction prior to specification. Warranty terms are not specified in available source data.

SPECIFICATIONS

Power	24 W	IP rating	IP68
CCT	3200 K	Input voltage	24 V
