Steel Cross Base with Bearing, Chrome Finish, 1-Year Warranty

- Steel cross base construction for structural stability
- Chrome finish resists corrosion and scratching
- Integrated bearing enables smooth rotational movement
- Compatible with various furniture and display stand types
- Backed by a 1-year warranty

OVERVIEW

The Steel Cross Base with Bearing is a structural support accessory designed for floor display and furniture applications requiring a stable, load-bearing foundation. It is compatible with a variety of stand and furniture types used in both commercial and residential settings.

Constructed from steel with a chrome finish, the base resists corrosion and surface scratching while presenting a clean, professional appearance. An integrated bearing allows smooth rotational movement where applicable, supporting consistent performance in display or seating installations.

The base carries a 1-year warranty.
