

# Ground Plastic Screw Base for Feather Flag Banners, Discontinued Replacement Component

- Ground plastic construction for the base assembly
- Screw-type mounting interface secures the flag pole section
- Backed by a 1-year manufacturer warranty
- Rated for compatibility with a 50,000 hour LED lifetime
- Serves as a like-for-like replacement for discontinued base units

## OVERVIEW

The 2-FP-B-Screw is a ground plastic screw base used as a replacement component for feather flag banner displays and compatible sign assemblies. It secures the flag pole to the ground through a screw-type mounting interface, allowing installers to replace a damaged or worn base without reconfiguring the full display.

This part carries a 1-year warranty and is rated for a 50,000 hour LED lifetime for compatibility with illuminated display configurations. It is designated as discontinued and is intended for sourcing existing installations that require a like-for-like replacement rather than new deployments.
