

Steel Spike Base for Flying Flag Poles, No Bearing

OVERVIEW

The 2-FP-B-Spike1 is a steel spike base designed for flying flag pole installations that do not require a bearing assembly. It is intended for ground-mount applications in outdoor commercial and promotional settings where a fixed, non-rotating base is acceptable.

Constructed from steel, the base measures 6 x 4 x 2 inches and weighs 35.4 oz. The spike configuration allows direct insertion into turf or soft ground surfaces, providing a stable footing for flying flag poles without the added complexity of a bearing mechanism.

No certifications have been confirmed for this product. Contractors and property managers should verify compatibility with their specific flag pole system prior to installation. Consult your Poli LED & Signs representative for warranty terms and applicable use conditions.
