

2.5 -Gallon Water Bag Ballast for Flying Banners, 20 in. Diameter, Gray

- 2.5-gallon capacity for ballast weighting of flying banner poles
- 20-inch outer diameter with 4.5-inch inner diameter for standard pole bases
- Gray plastic construction for a neutral, professional appearance
- Push-style cover for secure filling and closure
- 1-year warranty coverage
- Rated for 50,000-hour service life

OVERVIEW

The 2-FP-WB is a 2.5-gallon plastic water bag ballast designed to anchor flying banner and feather flag display systems. With a 20-inch outer diameter and 4.5-inch inner diameter, it fits standard banner pole bases and provides stable ground weighting for promotional signage in outdoor or high-traffic environments.

Constructed from durable plastic in a neutral gray finish, the bag features a push-style cover for secure filling and closure. It is designed for repeated use across multiple installations. A larger 3-gallon variant is available for applications requiring additional ballast capacity.
