

Plastic Water Tank Base for Flying Flag Pole, 45×45 cm (17.72"×17.72")

- Plastic construction filled with water for ground-level ballast
- Base footprint measures 45×45 cm (17.72"×17.72")
- Designed for use with flying flag pole display systems
- Cross base component required for assembly, sold separately

OVERVIEW

The 2-FP-WT is a plastic water tank base designed for use with flying flag pole systems. It provides weighted, ground-level stabilization for flag displays in commercial and outdoor environments.

The base measures 45×45 cm (17.72"×17.72") and is filled with water to add ballast, holding the flag pole upright in exterior settings. The cross base required for mounting is sold separately.
