

Aluminum Beam 1.57" Thick, 12 ft Length, 2-Side Ditch Profile with Clapboard Channel

- 12-foot overall length for extended span coverage
- 1.57-inch beam thickness for structural rigidity
- Ditch design on both sides for enhanced grip and stability
- Clapboard pattern on one side for a finished appearance
- Constructed from lightweight, durable aluminum
- Backed by a 1-year warranty

OVERVIEW

The 4-H4L-10 is a 12-foot aluminum structural beam measuring 1.57 inches in thickness, designed for commercial and industrial applications requiring a lightweight yet durable framing or mounting component. The profile features a ditch design on both sides for improved grip and mechanical stability, along with a clapboard pattern on one side that provides a clean, finished appearance.

Constructed from high-quality aluminum, the beam offers a favorable strength-to-weight ratio that simplifies handling and installation. A 1-year warranty is provided. Customization options are available upon request; contact Poli LED & Signs for project-specific requirements.
