

Aluminum 90° Corner Pole, 10 ft (3.06 m), 32 mm x 32 mm Square Profile, Corrosion Resistant

- 90° corner geometry for reinforced perpendicular joints
- 10 ft (3.06 m) length suited to full-height booth uprights
- 32 mm x 32 mm square profile for consistent section strength
- Aluminum construction with inherent corrosion resistance
- Smooth surface finish for easy cleaning and clean appearance
- Covered by a one-year manufacturer warranty

OVERVIEW

The 4-PL3.2-10 is a 90° corner aluminum pole measuring 10 ft (3.06 m) in length with a 32 mm x 32 mm square profile. It is used in modular exhibit and display framing as well as general structural and framing work, including booth uprights, fencing and outdoor lighting support installations.

Constructed from aluminum, the profile offers inherent corrosion resistance and a reduced weight relative to steel alternatives, making it practical for handling and field installation. The 90° corner configuration provides a continuous, reinforced connection at perpendicular joints, and the smooth surface finish supports both appearance requirements and routine cleaning. The pole is covered by a one-year warranty.

SPECIFICATIONS

OPTICAL

Beam Angle	135°
LED Lifetime	50,000 h

MECHANICAL

Product Dimensions	13*3mm
Length	3.06 m 10.0 ft
Finish	Smooth
Material	Aluminum
Weight	0.62 lb

ELECTRICAL

Operating Voltage	12 V
-------------------	------

ORDERING

Warranty	1 y
----------	-----

APPLICATIONS

- Tradeshow booth framing
- Modular exhibit structures
- Retail display frames
- Fabric lightbox corner assemblies
- Temporary event structures
