

Metal Ground Fixer for 4-PR6 Post-Top Fixtures, Multi-Unit Mounting

- Constructed from metal for durability in demanding environments
- Accommodates up to four 4-PR6 post-top fixtures per installation
- Compact form factor minimizes footprint during installation
- Resists vibration and external forces to protect mounted fixtures
- Backed by a 1-year warranty
- Compatible fixtures rated for 50,000-hour LED lifetime

OVERVIEW

The Metal Ground Fixer for 4-PR6 is a mounting accessory designed to secure and stabilize 4-PR6 post-top fixtures at ground level. It accommodates up to four 4-PR6 devices in a single installation, making it suitable for multi-fixture deployments across commercial, industrial, and site lighting applications.

Constructed from metal, the ground fixer is built for durability in demanding environments. Its design incorporates resistance to vibration and external forces to help protect mounted fixtures from movement and incidental damage. The compact form factor is intended to minimize footprint while simplifying installation and ongoing maintenance.

The unit carries a 1-year warranty, and the compatible 4-PR6 fixtures are rated for 50,000 hours of LED lifetime.
