

Plastic Cap for Half Octagonal 5-Direction Pole, G-80 Series

- Constructed from plastic for a lightweight, corrosion-resistant cap
- Sized to fit the half octagonal 5-direction pole (G-80 series)
- Caps unused fixture arm positions on multi-direction pole tops
- Finishes pole-top assembly for a clean, weather-resistant appearance
- Functions as an accessory component within the G-80 pole system

OVERVIEW

The 4-PRH4-CAP is a plastic cap designed for use with the half octagonal 5-direction pole system in the G-80 series. It serves as a protective cover for the pole top, finishing the installation where one or more fixture arms are not occupied.

The cap helps maintain a clean, weather-resistant assembly at multi-direction pole configurations commonly used in tradeshow and display pole hardware. It is intended as an accessory component within the G-80 half octagonal pole family rather than a standalone fixture.

SPECIFICATIONS

MECHANICAL

Material Plastic

APPLICATIONS

- Tradeshow display pole systems
- Multi-direction signage poles
- G-80 half octagonal pole installations
- Pole-top finishing for unused fixture arms
