- Screw -type mechanism enables straightforward installation and adjustment
- Compatible with various board types used in aluminum tradeshow booth systems
- Designed for secure, sturdy support within modular display configurations
- Sleek profile complements modern aluminum tradeshow booth aesthetics
- Backed by a 1 -year warranty

OVERVIEW

The Screw Type Board Support (SKU: 4-Z-BS-1) is a mounting component designed for use with aluminum tradeshow booth systems. It provides a secure, stable foundation for boards within modular display configurations, supporting flexible layout options across a variety of board types.

The support features a screw -type mechanism that allows for straightforward installation and on -site adjustment. Its construction uses materials selected for durability and compatibility with aluminum booth framing, and its profile is designed to maintain a clean, professional appearance consistent with modern tradeshow environments.

The product is backed by a 1 -year warranty.
