

Installation Tool for 4-Point Twist Lock Connector, 1-Year Warranty

- Engineered specifically for 4-point twist lock connector installation
- Interchangeable components accommodate multiple 4-point lock configurations
- Ergonomic grip design reduces operator fatigue during repetitive use
- Built for durability under demanding field installation conditions
- Backed by a 1-year manufacturer warranty

OVERVIEW

The 4-Z-Tool is an installation tool engineered specifically for 4-point twist lock connectors, designed to support secure and accurate connector engagement in commercial and industrial lighting applications. Its ergonomic construction promotes a reliable grip, reducing operator fatigue during repetitive installation tasks.

The tool is built for compatibility with various 4-point lock systems and features interchangeable components to accommodate different configurations. Construction is intended for durability under demanding field conditions, supporting consistent performance across installations.

A 1-year warranty is provided with this tool.
