Corner connector

Metal Corner Accessory for AL D-XM286 LED Profile Channel

- Reinforces corner joints in the AL/D-XM286 LED profile channel
- Integrates directly with the AL/D-XM286 system for compatibility
- Finished appearance matches the profile channel's aesthetic
- Assembly rated for 50,000-hour LED lifetime
- Backed by a 1-year warranty

OVERVIEW

The Metal Corner for AL/D-XM286 is a structural accessory designed to reinforce corner joints within the AL/D-XM286 LED profile channel assembly. It is intended for use in commercial and industrial installations where mechanical integrity at connection points is a priority.

Constructed for durability, this component strengthens the assembly at corner intersections, reducing the risk of structural failure or damage over the service life of the installation. Its design integrates directly with the AL/D-XM286 system for straightforward installation, and its finished appearance is consistent with the profile channel's overall aesthetic.

The assembly carries a 1-year warranty and is rated for an LED lifetime of 50,000 hours.
