

Metal Reinforcement Corner for Cabinet Sign Frame, Corrosion-Resistant, 1-Year Warranty

- Manufactured from corrosion-resistant metal for long-term durability
- Engineered specifically to reinforce 5-B259-9 cabinet sign frame corners
- Backed by a 1-year warranty
- Installs directly onto the frame without modification
- Finished to match the appearance of the host frame

OVERVIEW

The Metal Reinforcement Corner (5-D259-CN1) is an accessory designed specifically for the 5-B259-9 cabinet sign frame. It reinforces frame corners, improving structural integrity and providing protection against physical damage and wear at vulnerable joint points.

Constructed from corrosion-resistant metal, this corner piece integrates directly with the 5-B259-9 frame without modification. Installation is straightforward, and the component is finished to complement the appearance of the host frame.

The corner is backed by a 1-year warranty.
