

Aluminum Frame for Sign, 118 in. (3.0 m) Length, 23 mm Profile

- Aluminum construction resists rust and corrosion in outdoor settings
- Measures 118 in. (3.0 m) in length per section
- 23 mm profile width accommodates various sign panel sizes
- Lightweight design simplifies handling and transport
- Backed by a 1-year warranty

OVERVIEW

The 5-F15-10 is an aluminum extrusion frame engineered for commercial and industrial signage applications. At 118 inches (3.0 m) in length with a 23 mm profile width, it is suited for large-format sign installations where a clean, professional finish is required.

Constructed from aluminum, the frame offers resistance to rust and corrosion, making it appropriate for use in demanding or outdoor environments. Its lightweight construction simplifies handling during installation and transportation, and the profile is designed to accommodate various sign sizes with a secure fit.

The frame carries a 1-year warranty.
