

## Double-Sided Aluminum Fabric Frame Extrusion System, 15.5 × 120 mm Profile

### OVERVIEW

---

The EF 1001 is an aluminum fabric frame extrusion designed for single-sided fabric display systems used in commercial exhibitions, interior signage, and retail environments. The profile measures 15.5 mm in width and is supplied in 6000 mm stock lengths, making it suitable for custom-cut framing applications across a range of display formats.

Constructed from aluminum, the extrusion weighs 0.28 kg/m, providing a lightweight yet rigid framing solution. It is compatible with standard fabric tensioning accessories including fabric clips (EA 625) and hammerhead screws, and integrates with corner connectors and silicone bead retention systems for secure fabric installation.

No certifications, compliance listings, or warranty terms are confirmed in the available source data for this product. Contractors and specifiers should contact Poli LED & Signs directly for project-specific compliance documentation or custom length requirements.
