

Clear Silicone Edge Strip for SEG Aluminum Extrusions, 11mm x 3mm, 30m Roll

OVERVIEW

The 5-FZ-EG11x3C is a silicone edge strip measuring 11mm wide by 3mm high, supplied in a 30-meter roll. It is designed for use with SEG (silicone edge graphics) aluminum extrusions, securing printed fabric graphics into the frame groove for a clean, tensioned finish. Typical applications include retail displays, trade show exhibits, and interior signage installations.

The strip is manufactured from silicone, providing flexibility for consistent insertion into aluminum extrusion channels while maintaining a clear, low-profile appearance along the frame edge. The material offers durability under repeated graphic changes, making it suitable for installations that require periodic updates. An IP65 rating is noted for this product.

No certifications have been confirmed in the available source documentation for this product. Contractors and specifiers should verify compliance requirements independently prior to specification. No warranty terms specific to this SKU are stated in the available source data.

SPECIFICATIONS

Input voltage	12/24 V	Dimensions	11 x 3 mm
