

Corner Lighting Profile End Caps, 5 Pairs per Bag, LED Channel Termination

- Sold in bags of 5 matched pairs for multiple channel ends
- Symmetrical design fits corner lighting profile channel openings
- Durable construction rated for demanding installation environments
- Conceals open channel ends for a finished, polished look
- Backed by a 1-year warranty
- Compatible with LED systems rated up to 50,000 hours lifetime

OVERVIEW

The 5-LC30-Cap end caps provide a finished termination for corner lighting profile channels, concealing open ends for a polished appearance on completed installations. Each bag contains 5 pairs, supplying enough caps for multiple channel runs on a single job.

Constructed from durable materials intended to withstand wear in demanding environments, these end caps suit both DIY and professional projects. Their symmetrical design allows straightforward fitting into channel openings without specialized tools or hardware.

The caps are backed by a 1-year warranty, and are intended for use with channel systems rated for LED lifetimes up to 50,000 hours.
