

End Caps for LED Corner Channel, Set of 2, 50,000-Hour Rated Life

- Set of two end caps for LED corner channel profiles
- Shields open channel ends during shipping and installation
- Seats securely onto the extrusion for a finished appearance
- Constructed from durable materials for long-term wear resistance
- Supports a rated LED lifetime of 50,000 hours
- Backed by a 1-year warranty

OVERVIEW

The 5-LC4537-Cap End Caps are a replacement accessory set of two caps designed to fit LED corner channel extrusions, providing protection to the open ends of the channel during installation, transportation, or storage. Each cap seats securely onto the channel profile to shield internal components and maintain a finished appearance in completed installations. Constructed from durable materials, these end caps are built to resist wear and maintain a consistent fit, supporting a rated system life of 50,000 hours and backed by a 1-year warranty.
