

Aluminum Recessed Baseboard Profile End Caps, White Finish

- Aluminum construction for durable profile termination
- White finish coordinates with baseboard and wall trim
- Product dimensions measure 16×16×11 inches
- Seals open extrusion ends to prevent debris ingress

OVERVIEW

The 5-LDF120-19-CAP is an aluminum end cap designed for use with the recessed baseboard LED profile series. These caps provide a clean, finished termination at the open ends of compatible baseboard extrusions, preventing debris ingress and delivering a professional appearance in completed installations.

Finished in white to coordinate with baseboard trim and wall finishes, the end cap is sized at 16×16×11 inches for compatibility with the corresponding recessed profile extrusion.

SPECIFICATIONS

MECHANICAL
