

## Recessed Baseboard Aluminum LED Profile, 120x19mm, 3M Length, Silver Anodized

### OVERVIEW

The 5-LDF120-19 is a 120x19mm recessed baseboard aluminum LED profile designed to house and protect flexible LED strip lights up to 12mm in width. At 3 meters in length, it is suited for continuous baseboard lighting runs in commercial and residential installations where a clean, low-profile light line is required.

Constructed from 6063-T5 aluminum with an international-standard anodized silver finish, the profile provides both heat dissipation and physical protection for the LED strip. The milky PC diffuser transmits light at 86% efficiency with medium coefficient diffusion, producing uniform brightness while eliminating visible LED hot spots. The profile is rated for operating temperatures from -50°C to 100°C and accepts diffusers in transparent, milky, or black finishes. Assembly is tool-free via push-in diffuser installation.

### SPECIFICATIONS

<b>Operating temp</b>	-50 to 100 °C	<b>Dimensions</b>	120 x 19 mm mm
<b>IP rating</b>	IP20
