

End Caps for Drywall LED Channels, 2-Piece Set

- Set includes 2 end caps for a single channel run
- Seals open channel ends for a finished appearance
- Durable construction resists wear in typical use
- Backed by a 1-year warranty
- Compatible LED components rated for 50,000 hours of life

OVERVIEW

The 5-LDU7626A-Cap end caps are a 2-piece accessory set designed to seal or cover the open ends of drywall lighting profile channels, providing a clean, finished appearance on installed runs. They are intended for use in both commercial and industrial applications where a professional, polished termination is required.

Constructed from durable materials, these end caps resist wear and support long-term performance in typical installation environments. Each set includes two pieces, accommodating both ends of a single channel run.

Associated LED components carry a rated life of 50,000 hours and the set is backed by a 1-year warranty.
