

Black End Caps for LED Strip Channel,
5 Pairs per Bag

- Sold in bags of 5 pairs, 10 caps total per bag
- Black finish resists scratches and discoloration
- Two-piece design fits over open channel ends
- Lightweight construction for tool-free installation
- Backed by a 1 year warranty

OVERVIEW

The 5-LDW1213-Cap-BK is a set of black end caps designed to provide a clean, finished appearance on LED strip light channels. Each bag contains five pairs (10 caps total), making them suitable for multi-run installations in commercial, industrial, or architectural lighting projects. The caps fit over the open ends of compatible LED channel profiles, protecting internal components from dust and incidental contact while maintaining a professional appearance.
