

Recessed Drywall Flex LED Profile, 15W/m Max, 12mm Strip, 2m Length

OVERVIEW

The 5-LDW1513FLEX is a recessed drywall flex LED profile designed for seamless architectural lighting integration. Constructed from 6063-T5 aluminum with a silver anodized finish, it accommodates LED strips up to 12mm wide and is engineered for plaster-in drywall installations where a clean, flush appearance is required.

The profile supports a maximum power load of 15W/m and is supplied in 2m lengths weighing 0.3kg/m. A silicone diffuser is included, and the system ships with end caps (with and without hole options), a 180° LED strip metal connector, and pearl cotton for plaster preparation. Additional finish options include black anodized and powder-coated white or black.

No certifications are confirmed for this product. Contractors should verify local code compliance prior to installation.
