

Black End Caps for LED Channel, 2-Piece Set, Drywall Profile Compatible

- Includes two matching black end caps per set
- Finished in black for a clean, professional appearance
- Provides secure, precise fit within compatible LED channel profiles
- Backed by a 1-year warranty
- Rated for compatibility with LED components rated to 50,000 h lifetime

OVERVIEW

The 5-LDW2514-Cap-BK is a set of two black end caps designed to provide a clean, finished termination for LED channel installations. Each set delivers a symmetrical, professional appearance at the open ends of compatible LED channel profiles, concealing internal components and contributing to a polished final result. Constructed from durable materials, these end caps are built for long-term performance and a secure fit within their intended channel profile. Their straightforward installation makes them suitable for both professional contractors and experienced DIY installers. The set carries a 1-year warranty and is rated for use with LED components rated to 50,000 hours of operating life.
