

Opal Frosted Cover for Drywall Lighting Profiles, 15W, Glass Diffuser

- Constructed from opal glass for soft, diffused light output
- Rated for use with 15W LED strip lighting sources
- Associated LED lifetime rated at 50,000 hours
- Backed by a 1-year warranty
- Fits standard light fixtures for straightforward installation

OVERVIEW

The 5-LDW2618-CV is an opal frosted glass cover designed as a diffuser accessory for drywall lighting profiles used with LED strip lighting installations. Its opal glass construction produces soft, diffused light output that reduces glare and improves visual comfort in both commercial and residential applications. The cover is designed to fit standard light fixtures for straightforward integration into existing or new lighting layouts.

The cover is built for durability and is intended to maintain its appearance over extended service life. Its diffusing properties can reduce reliance on supplementary lighting sources within a space, contributing to overall lighting efficiency. The associated LED source is rated at 15 W with an LED lifetime of 50,000 hours and carries a 1-year warranty.
