

Silicone End Cap for LDW3515FLEX Drywall Flex LED Strip Profile

- Made of silicone material for flexible, durable sealing
- Designed specifically for the LDW3515FLEX drywall flex profile
- Provides a finished termination point for exposed strip ends
- Suitable for drywall ceiling and cove lighting applications

OVERVIEW

The 5-LDW3515FLEX-Cap is a silicone end cap designed for use with the LDW3515FLEX drywall flex LED strip. It provides a finished termination point for exposed strip ends in drywall ceiling and cove lighting installations.

The cap seals the open end of the flex profile, protecting the LED strip and channel from dust and physical contact while giving the installation a clean, finished appearance.

SPECIFICATIONS

MECHANICAL

Material	Silicone
