

End Caps for Drywall Lighting Profiles, 2-Piece Set

- Set includes two end caps for complete profile closure
- Durable construction resists damage from environmental exposure
- Provides a seamless, finished fit at profile ends
- Backed by a 1-year warranty
- Compatible with fixtures rated for 50,000 h LED lifetime

OVERVIEW

These end caps are designed to close off drywall lighting profile channels, sealing the open ends of the housing to prevent ingress and protect internal components. Each set includes two caps and is intended for use across commercial and industrial applications where a clean, finished appearance is required alongside reliable protection.

Constructed from durable materials, the caps are built to maintain a seamless fit over the service life of the profile, reducing the risk of damage from environmental exposure. Installation is straightforward, making them suitable for field use by contractors and installers.
