- Opal frosted finish diffuses light evenly and reduces glare
- Semi-translucent construction suited to linear fixture apertures
- Rated for 50,000 - hour LED lifetime
- Backed by a 1 - year warranty
- Durable material resists discoloration over time
- Sleek, low - profile design integrates into interior spaces

OVERVIEW

The 5-LF2126-CV is an opal frosted cover designed for LED linear fixtures, providing uniform light diffusion and glare reduction in both commercial and residential installations. Its semi-translucent construction distributes light evenly across the fixture aperture, making it suitable for office, retail, and general interior lighting applications.

Constructed from durable materials, the cover is engineered for longevity and resistance to discoloration over time. Its low-profile, sleek design allows it to integrate cleanly into standard interior environments without visual disruption.

The cover is rated for a 50,000 -hour LED lifetime and is backed by a 1 -year warranty.
