

Steel Mounting Band for LED Strip, 16mm Wide, 25 Meter Roll

- Steel construction for durable, long-term mounting support
- 16mm width sized for compatibility with 5-LR/Base-B system
- Supplied as a 25 meter roll for continuous long-run installations
- Functions as a passive heat sink to help extend LED lifespan
- Rated for 50,000 hour LED lifetime when used with compatible strips
- Backed by a 1 year warranty

OVERVIEW

The 5-LR-Band-B-25M is a steel mounting band supplied in a 25-meter roll, designed for securing LED strip lights in commercial and industrial installations. At 16mm wide, it is compatible with the 5-LR/Base-B mounting system and provides stable, consistent support along the full length of a strip run.

Beyond mechanical support, the steel band serves as a passive heat sink, helping to dissipate heat away from the LED strip and extend its operational lifespan. The material and construction are suited for long-term use and can be cut or shaped to accommodate varying installation lengths and layouts.

SPECIFICATIONS

OPTICAL

LED Lifetime 50,000 h

MECHANICAL

Length 25 m
82.0 ft

Strip Width 16 mm
0.63 in

Material Steel

Mounting 5-LR/Base-B system

ORDERING

Warranty 1 y

APPLICATIONS

Commercial cove lighting installations

Industrial linear strip mounting runs

Architectural accent lighting channels

Retail display shelving illumination

Warehouse and facility linear lighting
