

Silicone Flex Tube Channel for LED Strip, 16x16mm, Fits 6–10mm PCB

OVERVIEW

The 5-LS1616 is a silicone flex tube channel designed to house and protect LED strip assemblies in commercial and architectural lighting installations. Supplied without strip, it provides a clean diffused profile suitable for cove lighting, accent runs, and concealed linear applications.

The channel measures 16x16mm in cross-section and accommodates PCB widths of 6mm, 8mm, or 10mm. Constructed from silicone, it offers flexibility for curved or irregular mounting surfaces. Each roll covers 10 meters.
