

Opal Frosted Cover for LED Strip Channel, 8.2 ft / 98 in (2.5 m)

- Opal frosted finish diffuses light evenly across the 98 in length
- Length of 8.2 ft (2.5 m) matches standard LED channel runs
- Rated LED lifetime of 50,000 hours when paired with compatible strips
- 1 year warranty coverage on the cover
- Reduces glare and hotspots for uniform ambient illumination

OVERVIEW

The 5-LW1213-CV is an opal frosted cover designed for use with LED strip light channels. Its opalescent, frosted finish provides uniform light diffusion across the length of the fixture, reducing glare and softening output for a clean, professional appearance. Suitable for both commercial and residential installations, it serves as a functional lens cover for upgrading or completing LED channel assemblies.

The cover is constructed from high-quality materials selected for durability in ongoing commercial and residential use. Its diffusing properties help eliminate hotspots along the LED strip, producing consistent illumination suitable for architectural, display, and general ambient lighting applications.
