

Opal Frosted LED Strip Cover, 8.2 ft / 98 in (2.5m), 50,000h Rated

- Opal frosted lens diffuses light and reduces glare
- Length of 8.2 ft / 98 in (2.5m) for extended strip runs
- Rated for compatibility with 50,000-hour LED strip lifetime
- Backed by a 1-year warranty
- Durable construction resists wear over extended use

OVERVIEW

The 5-LW1606-CV Opal Frosted LED Strip Cover is a diffuser accessory designed to improve the finished appearance of LED strip lighting installations. Its frosted surface distributes light evenly across the lens, reducing glare and minimizing harsh shadows for a cleaner, more uniform output. Suitable for both commercial and residential applications, it is compatible with a range of interior environments and fixture styles.

Constructed from durable materials, the cover is built to resist wear over extended use. The opal diffusion profile softens direct LED output, producing a smoother light spread that suits task, accent, and ambient lighting layouts where point-source visibility is undesirable.

The cover is backed by a 1-year warranty and is rated for use with LED strips having a 50,000-hour lifetime.
