

LED Channel End Caps, 2-Piece Set, 1-Year Warranty, Replacement Accessory

- Sold as a 2-piece set for paired channel terminations
- Resists wear, impact, and corrosion during normal service
- Engineered for a precise, snug fit into compatible channel ends
- Installs or removes without specialized tools
- Compatible with LED strip systems rated up to 50,000 hours
- Backed by a 1-year warranty

OVERVIEW

These replacement end caps are designed to close and protect the open ends of compatible LED channel profiles. Sold as a 2-piece set, they provide a clean, finished appearance while shielding the interior of the channel from dust, debris, and incidental contact. Typical applications include furniture installations, architectural millwork, and equipment enclosures where a professional termination is required.

Constructed for durability, the caps are designed to resist wear, impact, and corrosion under normal service conditions. They are engineered for a precise fit and can be installed or removed without specialized tools, reducing labor time during installation or maintenance. They are intended for use with LED strip systems rated for up to 50,000 hours of operation.

The end caps are backed by a 1-year warranty.
