

Silver Frosted Cover for LED Channel Lighting

- Silver frosted finish diffuses point-source LED light
- Designed to mate with compatible LED channel systems
- Suitable for architectural and accent lighting installations
- Provides uniform light distribution along channel length

OVERVIEW

The 5-LW2015-10-CV is a silver frosted cover designed for use with compatible LED channel lighting systems. It provides a diffused finish that softens and distributes light output along the channel, producing a uniform, even glow rather than visible individual LED points.

This cover is suited for architectural, display, and general accent lighting applications where a clean, consistent appearance along the channel run is required.
