

## Aluminum LED Channel Profile, Silver Anodized, 20x15mm, 9.84 ft Length

### OVERVIEW

---

The 5-LW2015-10 is a silver anodized aluminum LED channel profile measuring 20mm wide by 15mm tall, supplied in a 9.84 ft length. Constructed from 6063-T5 aluminum with a high-standard anodized finish, it provides both heat dissipation and physical protection for LED flexible strip installations. The profile accommodates strip widths up to 17mm and is compatible with milky, transparent, or black PC diffuser covers.

The milky diffuser option transmits 86% of light output with medium coefficient diffusion, delivering uniform brightness while minimizing visible LED hot spots. The profile is rated for operating temperatures from -50°C to 100°C. Assembly is tool-free via a push-in diffuser retention method.
