

Black Anodized Square LED Aluminum Channel Profile, 20x20mm, 3m Length

OVERVIEW

The 5-LW2020-BK is a 20x20mm black anodized aluminum LED channel profile designed to house and protect flexible LED strip installations. Constructed from 6063-T5 aluminum with a high-standard anodized finish, it provides both thermal management and physical protection for LED strips up to 16mm in width. This SKU is sold only with the matching cover 5-LW2020-CV-BK and is available in a 3m length.

The profile is rated for operating temperatures from -50°C to 100°C, making it suitable for a wide range of interior and exterior applications. The black anodized surface finish offers a clean architectural appearance where fixture integration into dark or contrasting surfaces is required.

SPECIFICATIONS
