

End Caps for LED Channel — 5 Pairs per Bag

- Sold as 5 pairs per bag for multi-run installations
- Designed to close open ends of LED channel extrusions
- Durable material resists wear from indoor and outdoor exposure
- Installs without specialized tools for quick finishing
- Backed by a 1-year warranty

OVERVIEW

End caps for LED channel extrusions, sold 5 pairs per bag. These caps close off the open ends of compatible LED channel profiles, providing a finished appearance and protecting internal components from dust and incidental contact. Suitable for indoor and outdoor installations.

Constructed from durable materials intended to resist wear over time, the caps are designed for straightforward installation without specialized tools, making them appropriate for professional electrical and lighting contractors as well as renovation projects.
