

LED Strip End Caps for Aluminum Profiles, 5 Pairs per Bag

- Sold in sets of 5 pairs per bag for multi-run installations
- Flexible grip design accommodates minor dimensional variation
- Tool-free installation for fast, straightforward fitting
- Durable material construction resists wear and tear
- Suitable for industrial, residential, and commercial applications

OVERVIEW

The 5-LW2310-CAP End Caps Set provides a clean, finished termination for LED strip channel profiles, pipes, poles, and other cylindrical or extruded forms. Sold in sets of five pairs per bag, these caps seal open ends against dust and physical contact while delivering a finished appearance in commercial, industrial, and residential installations.

Constructed from durable materials selected for resistance to wear and tear, the caps feature a flexible grip that aids installation and accommodates minor dimensional variation across compatible profiles. The design allows for straightforward, tool-free fitting, making them a practical accessory for contractors and installers working across a range of project types.
