

End Caps for LED Strip Channel, 5 Pairs per Bag

- Sold as 5 pairs per bag, 2 pieces per set
- Caps both ends of a single channel run
- Made from precision-formed, durable materials
- Designed for easy, straightforward installation
- Provides a clean, finished termination for extrusion profiles

OVERVIEW

The 5-LW2626A-Cap is a set of end caps designed to provide a clean, finished appearance on LED strip channels and similar extrusion profiles. Each set consists of two pieces, making them suitable for capping both ends of a single channel run. These end caps are applicable across a range of installations including furniture, piping, and structural extrusions where a professional termination is required.
