- Low - profile design integrates discreetly into existing installations
- Constructed for durable, long - term performance in commercial or residential settings
- Compatible with LED strips rated for up to 50,000 hours of operation
- Backed by a 1 - year manufacturer warranty
- Straightforward installation for cable and strip management

OVERVIEW

The 5-LW3535-H-Clip is a wall mount clip designed for securing LED strip lighting and related components to wall surfaces. It is suited for both commercial and residential installations where a clean, organized cable and strip management solution is required.

The clip offers a straightforward mounting process and is constructed for durable, long - term use in a range of environments. Its low - profile design allows it to integrate discreetly into existing installations without adding visual bulk, and it is intended for use with LED strip lighting rated up to 50,000 hours of operation.

The clip is backed by a 1 - year warranty.
