

End Caps for LED Strip Channel, 2-Piece Set

- Sold as a 2-piece end cap set for channel termination
- Installs and removes without specialized tools
- Backed by a 1-year warranty
- Rated to complement LED strip systems with 50,000-hour lifetime
- Provides a finished, protective closure at channel ends

OVERVIEW

The 5-LW3535A-H-SC-Cap is a 2-piece end cap set designed to provide a clean, finished appearance on LED strip channel installations. Each set installs without specialized tools, making them practical for field use during commercial or industrial lighting projects.

Constructed for durability, these end caps are compatible with a range of channel profiles and applications, offering a straightforward way to close off channel runs and protect internal components at termination points.

Backed by a 1-year warranty, consistent with the 50,000-hour rated lifetime of the LED strip systems they are designed to complement.
