

Spring Clip Mounting Accessory for Recessed LED Extrusion Profiles, 1-Year Warranty

- Spring clip design secures extrusion components without extra fasteners
- Provides a secure mechanical connection within the recessed profile assembly
- Supports consistent positioning for a clean finished installation appearance
- Compatible with recessed LED extrusion profile systems
- Associated LED system rated for a 50,000-hour lifetime
- Backed by a 1-year warranty

OVERVIEW

The 5-LW3535A-H-SC-SC is a spring clip mounting accessory engineered for use with recessed LED extrusion profiles. It delivers a secure mechanical connection within the extrusion assembly, supporting consistent positioning and a clean finished appearance across a range of recessed lighting installations.

The spring clip design simplifies the mounting process by allowing extrusion components to seat firmly without additional fasteners, making it a practical solution for contractors and installers working with compatible recessed profile systems. The associated LED system carries a 50,000-hour lifetime rating, supporting long-term installation reliability.

The product is backed by a 1-year warranty.
