

End Caps for LED Linear Fixtures, 2-Piece Set

- Sold as a 2-piece end cap set
- Compatible with associated LED linear fixture profile
- Constructed from premium materials for wear resistance
- Designed for straightforward installation on multiple mounting configurations
- Backed by a 1-year warranty
- Supports fixtures rated for 50,000 hour LED lifetime

OVERVIEW

The 5-LWU4818-Cap is a 2-piece set of end caps designed for use with compatible LED linear fixtures. These caps provide a clean, finished appearance at fixture terminations and are intended for professional installation in commercial and industrial applications.

Constructed from premium materials, the end caps are built to resist wear and tear over extended service. Their design accommodates straightforward installation across multiple mounting configurations, with a fit intended to align precisely with the corresponding fixture profile.
