

Metal Corner Connector for 5-S2 LED Channel, Discontinued Item

- Metal construction for structural corner joints
- Designed specifically for the 5-S2 LED channel system
- Backed by a 1-year warranty
- Compatible with LEDs rated for 50,000-hour lifetime
- Discontinued item with limited availability

OVERVIEW

The 5-S2-CN1 is a metal corner connector designed for use with the 5-S2 LED channel system. It provides a structural solution for joining channel sections at corners, supporting installations where directional transitions in the channel run are required.

This item is associated with a 1-year warranty and is rated for compatibility with LED components carrying a 50,000-hour lifetime rating within the 5-S2 system.

Note: this item is discontinued and may have limited availability.
