

270° Round Series Neon Flex Tube for 8mm PCB LED Strip, Sold Per Meter

- 270-degree round output angle for uniform neon-style diffusion
- Accepts 8mm PCB LED strips
- Sold per meter for custom cut-to-length runs
- Rated for 50,000-hour LED lifetime
- Backed by a 1-year warranty

OVERVIEW

The 270° Round Series Neon Flex Tube is a flexible diffusion sleeve designed to accept an 8mm PCB LED strip, producing a continuous, uniform neon-style illumination profile across a 270-degree output angle. It is suited for architectural accent lighting, signage backlighting, cove lighting, and similar commercial or decorative applications where a rounded neon aesthetic is required.

The tube is sold per meter, allowing contractors and installers to cut to the required run length; the LED strip itself is not included and must be sourced separately.

The assembly carries a 1-year warranty and is rated for an LED lifetime of 50,000 hours when paired with a compatible 8mm PCB strip.
